A line from Kim Kardashian

Matter changes its state
when energy is supplied to
it. Solids become liquids, &
liquids become those classic

black dance shoes that bars
& restaurants often say they
have so as to seem as
graceful as other places that

support female pelvic health
& bladder control through
state of the art epic experiences.
Our core area of expertise is

sputtering technology. You
do the work; but based
largely on anecdotal evidence
it seems impossible to completely

fix a prolapse with pelvic floor
exercise or repair bikes by
means of techniques less toxic
than conventional solvent-based

products whilst still including
a sense of responsibility
toward the less fortunate &
references to plasma television.

Waikiki sunset

Loralee believes that the cornerstone to providing uncompromised eye care is clean boxes with high ceilings & committed technicians dedicated to quality repairs. The cook was very personable, an exemplary professional. I was so excited. He came out in January.

Stepping back into the early
days of the Red Lion Hotel,
we were approached by the

whose ethical business aims
to provide its customers with the
opportunity to buy a recycled
Anaesthesia Trolley or a two crank

real impact on our local communities. No posts.
No Vintage or Retro items on eBay. No Home. Just up-
holstery with a fire safety label. & an occasional speech bubble."

A great storm devastated the fitness instructor

There is a such as red fish & root beer barrels that is not mine but belongs to its rightful owners. How about a big shout out for the staff who did such a good job pushing the local legislature to fix the streaming. To call Red Fish "cajun" is to finally assert that language has no meaning. There's chicken in dog food, yet we don't call chicken 'dog food.' It is just canned Creole for the northern masses. I took my little brother there & we ended up full of grease. From the latest Latin American files we learn that at least 1,000 persons lost their lives. We recommend you purchase trip cancellation insurance to cover any losses should you have to drop out due to unforeseen illness or other emergency.

There are 68 calories in 1 slice of Sprouted Wheat Bread.

Sprouted wheat bread is an ancient food with modern-day benefits.

Modern-day benefits include a garage, & large garden grounds to the rear.

Grounds to the rear still gleam & hummingbirds flit amid the engulfing foliage.

The engulfing foliage of a giant Swiss Cheese Plant & a Madagascar Dragon Tree.

A Madagascar Dragon tree is a very hardy, hard to kill indoor plant.

The minutes from the Fed's last meeting show how policy-makers decided to keep the stimulus going. Everyone

heard the shot. Was the rifle recovered really a Mauser? Alternate between "the stone, the rifle, & free speech," says

The / Fine Art / of Water Quality

When placed inside a shooting
gallery, all Kansas City
flea markets have senior
moments & become
totally disengaged from
the outside world. They
no longer automatically
download podcast

really need to play catch-up.

A line from Edgar Allan Poe

servatives, has setup a camera

À propos of the wet snow

"There are States where the family hardly exists," he said to her after a light-hearted romp through the clichés of

contemporary performance. "You are an awfully good sort. Read *Notes from the Underground* or *Treatise on Cubic Form*."

Mr. Richard Mutt sent in a fountain—now I can grow this thing that I have always thought was an artichoke.

A line from Yo Yo Ma

The last two outings of the U.S. Patent Office have disappointed at the box office. The first, based on three short

plays by Molière, was a podcast of naturally carbonated water: the second, a device that looked like a tiny wash-

board, punched holes into another dimension to make the transmission of music travel faster than light. The

new endeavor, which has an optional external battery, uses an antenna splitter to take advantage of loopholes in both

European laws & the very root of traditional American popular music. Many people like that tingling feeling on their tongue.

Robert Pattinson was planning on proposing . . .

It has become a kind of breather between the high-tech wonders of the first act & the final 1-liter plastic bottle containing an unknown uplift of the oath-taking, flag-injustice substance. Have had experience of both, not being able to avoid the body armor that police said he wore during the techno music blasting a ballistic helmet & one & obtain measure while they waited for bomb-sniffing humanity that stays unchanging within the Games' changing contexts — with spectacle — judges to score these performances, but legions who watch worldwide will all have something to say about them, for no man who is worthy to be called a man described him as a recluse, to their friends & neighbors. In May, he began buying a brief, proud display of folkloric arts & apparently stocking up on them hence there arose laws & mutual covenants; & that which is ordained by law is vest, ballistic leggings, throat & groin protector, a gas mask & black tactical gloves. Justice; it is a mean or compromise, between the best of all, which is to do a precautionary graduate program in sorry neuroscience. Before he left for the movie theater he booby-trapped his apartment as the lesser evil, attaching several trip wires for the thematically unjust, but it's still the heart of the show, a many-colored cavalcade of gorgeous unintended consequences, termed lawful & just. This they affirm to be the origin of nature & did give you steam engines, shooting, great pop music & comedy & the roots of social networking. It was ugly there for a while, but we're all right — & everybody dance now.

A line from Harry S. Truman

In the devastating aftermath of Fox News' continued assault on the labor movement, bumble-

bees seem to be dwindling at an alarming rate. It's not always about getting up close & personal—& even

channeling the late great Jamaican musician Bob Marley cannot cure all financial ills—but matters

of the mind & spirit are wreaking havoc on people in the Midwest. Trauma accumulates in sensitive

Spring is here

Most everyone in the United Kingdom expected to experience little difficulty behind the wheel. No way. Understanding, as we understand it, is misunderstanding. Elias Canetti wrote that. No alcohol in the blood; but the secret use

of people's militia breached the government's strict rules for both Grand Opera & prescription drugs. Ambition leads me, wrote Captain James Cook. Rodgers & Hart put it in to the negative. The Philippines' oldest church lost its bell tower.

Multiple inheritance leads to a taxonomy of concepts. Lineage relates to the persistence of an entity over time. New arguments in favour of the four-dimensional ontology confirm that death & the separation of body & soul play an important role in the analysis of circadian systems.

If a meme were continually interested in "what happens next," activity must be causing change, therefore, somewhere in the brain. Even if they can think independently & move of their own accord, the claim that a thing exists, when added to our notion of a thing, does not add anything to the concept.

I've always gone along with the orthodox interpretation & used the term to refer to any cultural entity (such as a song, an idea, or a religion) that an observer might consider a replicator. The idea that our consciousness is an interlocking system of memes is reflected in the early stimulus-blocked responses that are part of a generalized fear & feeling of loss of control.

Once the roles of cause & effect are assigned to objects in interactions, people tend to overestimate the strength & importance of the causal object & underestimate that of the effect object in bringing about the outcome. This bias is termed the causal asymmetry. Eventually we will reach a point in the past where all humans can be divided into two groups. The storage assumption greatly simplifies the treatment of resource variability.

& now that the Linnean system has been largely replaced by a cladistic system in which any clade or complete branch of the evolutionary tree is given a name, & the only remaining fixed rank is genus, luck plays only a small part in discovering fossils. There is a song Freddie Mercury sang that I don't remember. It started "I want to break free" but those two bars are all I recall. The next two bars were a repeat of the first. What came after that was the phrase repeated but extended. I cannot remember how it went.

I am in a cycle of mental paralysis. Not a mindset but a mind rut. I cannot remember how the song went though I'm singing it now. I am not replying to emails though they continue to arrive. I cannot remember how to turn on the pc though that is where I am writing this. I want to break free. My life is two bars, repeated. I cycle between them. One serves lethe, the other leaves me be. I do not recall what I am doing here or where here is since I thought I was there already. I am missing out letters as I type. That Freddie Mercury song has nothing to do with this.

I come home from work. I do not remember who I am. Somebody winds me up & I write mechanical poems. "It will keep your hand in" a voice says somewhere. I write home & come & wonder why they don't sound the same. People send me emails but I don't reply. I don't recognise the name. They cannot be for me for I do not remember who I am. There is a song Freddy somebody sang.

There is another song by a group called Queen. I don't recall who the lead singer was, do not remember if I ever heard them. I don't recall the lines that went "If I'm not back again this time tomorrow / carry on, carry on as if nothing really matters."

I cannot remember who I am. I cannot remember how to write. I write to nobody any more so does it really matter if I write or not. For myself, to myself. To anybody, to nobody. Nobody writes to me & when they do I do not answer. Wind me up / I right mechanical poems. Prick me, do I not bleed? I cannot remember.
